SUMMARY

Software Engineer with 5 years building **Python and TypeScript** projects and Meta **LLM evaluation** experience. Skilled in **preference data, rubric creation, data pipelines, and infrastructure**; completed 500+ evaluations and reduced training data preparation time by 40% through automation and quality validation.

WORK EXPERIENCE

Meta | **Software Engineer** | Remote | Aug 2026 - Present

- To produce reliable **preference data**, refined **evaluation rubrics** and ranked model reasoning against scoring criteria, completing 500+ **LLM evaluations** with consistent guideline adherence.
- Replaced manual training data preparation with **Python annotation and labeling** scripts for category assignment and relevancy scoring, reducing preparation time by 40%.
- Prevented low-quality samples from entering **data pipelines** through labeled-data review and **Python** validation tests; communicated findings to researchers and engineers, reducing rework by 30%.

ANTERM | **Software Engineer** | Remote | Aug 2024 - Jun 2026

- Replaced manual revenue operations with **AI workflow automation** for 3+ accounts, including Emoha, Topmate, and Clinik, owning requirements, solution design, deployment, and support.
- Addressed low outbound engagement with Konduit lead-enrichment **pipelines** connecting research, lead scoring, CRM updates, and outreach, improving response rates by 6–8%.
- Restored reliable production workflows across 3+ accounts by troubleshooting CRM integrations, resolving sync defects, and correcting lead-data gaps and **pipeline** failures.

Starlite Infotech | **Full Stack Software Engineer** | India | Jan 2023 - Aug 2024

- Resolved feature reliability gaps with **TypeScript**, React.js, and Node.js APIs and interfaces across 5 core modules, reducing QA defects by 30%.
- Prevented release defects by integrating **PyTest** and Jest suites into **CI/CD pipelines** with code review gates, reducing production bugs by 35%.
- Resolved slow reporting endpoints through PostgreSQL indexing and connection pooling, reducing average API latency by 30% across 12 endpoints.

PROJECT EXPERIENCE

AI Job Application Agent | Personal Project | Jul 2026

- Engineered **LLM** prompts to extract job requirements and tailor application content while preserving meaning across 40+ career sites.
- Implemented **LLM**-based relevancy scoring and **ranking** to prioritize opportunities, filtering out 60% of low-fit roles.
- Generated concise job summaries and application responses with Claude and **LLM APIs**, reducing manual drafting time by 80%.

Polish Music Matching Platform | Personal Project | Jun 2025 | GitHub | Live

- Built real-time matching services with **Python**, FastAPI, and React, onboarding 200+ users within two weeks of deployment.
- Optimized PostgreSQL data models and queries for concurrent traffic, reducing match retrieval time by 60%.
- Wrote 45+ **unit tests** and enforced Git code reviews before deployment, reducing regressions by 50%.

TECHNICAL SKILLS

- **Languages: Python, TypeScript**, JavaScript, SQL, Java, C++, HTML5, CSS3
- **AI Evaluation: Preference Data Collection, Rubric Creation, Evaluation Criteria, Data Labeling**, LLM Evaluation, Response Ranking, Relevancy Scoring, Training Data Preparation
- **Frameworks and Data:** React.js, Node.js, Express.js, FastAPI, SQLAlchemy, Pydantic, WebSockets; PostgreSQL, MySQL, MongoDB, SQLite, Redis, Query Optimization
- **Infrastructure and Testing:** Docker, Kubernetes, **CI/CD**, GitHub Actions, AWS, Azure, PyTest, Jest, Unit and Integration Testing, Git, GitHub, VS Code, Postman
- **Core CS and AI:** DSA, OOP, Distributed Systems, Microservices, Concurrency, LLM APIs, RAG, LangChain, LangGraph
- **Data and Communication: Data Pipelines, Data Quality**, Technical Writing, Research Collaboration

EDUCATION

Quinnipiac University | **MS, Computer Science** | Hamden, CT | May 2026
Coursework: Deep Learning, Database Systems, Software System Design, Cloud Computing.

CERTIFICATIONS

LangChain and RAG Systems (DeepLearning.AI) | Docker and Kubernetes for Developers (KodeKloud)
